- Applicable Machine: Surface Planer/ Thicknesser /Double Side Planer.

This product strictly selects German carbide alloy and uses German technology to grind and process. Compared with traditional processing methods, brand-new material selection and manufacturing technology make the product performance far surpass similar products, long life and high durability. It is professionally used for cutting hardwoods. The alloy hardness is HRC90, the red hardness is the best, the gap is less than 0.1mm, and the number of sharpening is the lowest under the same planing conditions.

- The image shows a white and blue MX5117B universal testing machine. It features a large circular pressure gauge with a yellow and black scale on the front panel. The machine has a blue top surface and a white base. The model number 'MX5117B' is printed on the front. A yellow load cell is mounted on top of the machine. The brand name '马氏 MAS' is visible on the top surface.

This product uses sophisticated grinding equipment and the material is W4-Mo3C4V. It is characterized by high hardness, wear resistance and red hardness. This product is a flat steel base material without cutting edge treatment. It is suitable for woodware factories, hardware factories, etc. The secondary modification processing of special processed parts is also suitable for turning and milling purposes in hardware factories.

Spiral cutter parts

PCD Pre-milling Cutter

金刚石预铣刀

PCD刀粒，使用五轴加工中心精加工，可控精度高
PCD cutting tool, fine processing using five-axis machining center, high controllable precision.

Premium Polycrystalline Diamond

High-quality materials, 30 times the life of WC cutters, sharp edge, good cutting effect

Sharp Blade

Special cutting edge angle design reduces cutting resistance.

Reusable

It can be reused after re-grinding, super cost-effective.

Unique Craftsmanship

Unique mirror grinding process, so that the tool does not stick to chips during high-speed cutting.

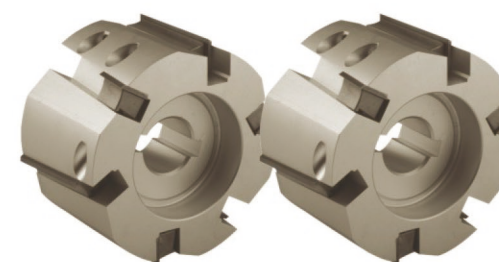

本产品属于转换式铣刀适应于预切，铣边和仿形铣，无毛刺精加工，素板和贴面刨花板，中密度板的精加工。

This product is a convertible milling cutter suitable for pre-cutting, edge milling and profile milling, burr-free finishing, plain board and veneer particle board, medium density board finishing.

舍弃式封边机预铣刀

Replaceable Pre-milling Cutter for Edge Banding Machine

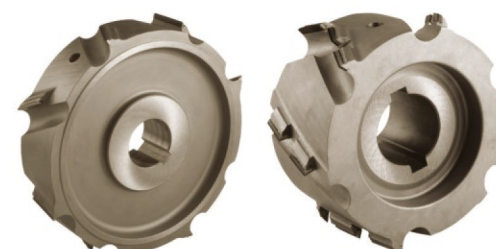

铝合金刀体，轻盈耐用，加工精良，本产品属于转换式铣刀适应于预切，铣边和仿形铣，无毛刺精加工，素板和贴面刨花板，中密度板的精加工。

Aluminum alloy blade, lightsome and durable, treatment is excellent, the product belongs to convert cutter, adapted to the pre-cut, edge milling and copying milling burr finishing, plate and veneered particleboard, MDF finishing.

FAQ

Gap between male and female:
There are too few meters for processing solid wood floor cutters, and they are not durable.
How to improve the efficiency of solid wood composite board and laminate flooring processing line processing.

Solution

Adjust the spacer, check the runout and accuracy of the machine tool shaft
Use hydraulic bushings to increase tool machining accuracy
Use high-quality PCD cutter for processing.

Ripple Roughing Cutter 三刃波纹粗铣刀

适用机型
门锁孔机

Applicable models
Door lock machine

螺纹刀刃设计 Threaded Edge Design

- 独特的螺纹刀刃设计，切削快效率高，是普通铣刀的2-3倍。
- The unique threaded blade design provides high cutting efficiency and is 2-3 times higher than that of ordinary milling cutters.

高强度 抗弯曲 High strength

- 有优良的物理性，刀具寿命长。
- Excellent physicality and long tool life.

排屑好 Good chip removal

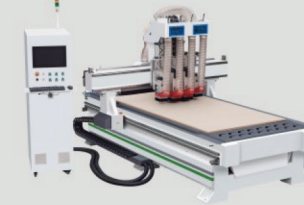

- 刃口锋利，排屑顺畅，不粘刀，使工件的切边光滑无毛刺。
- The cutting edge is sharp, the chip removal is smooth, and the knife is not stuck, so that the cut edge of the workpiece is smooth and free of burrs.

CNC Machining Center Tool

Double-edged Milling Cutter 双刃复合铣刀

适用机型
开料机

Applicable models
Cutting machine

高频焊接 不易断刀 High frequency welding

- 刀柄采用高品质合金制作，与刀头高频焊接，坚固不易断刀。
- The shank is made of high-quality alloy and is welded to the cutter head with high frequency. It is not easy to break the knife.

锋利耐磨 Sharp wear

- 严谨的设计研发并反复测试后的刃角，提高使用效率。
- Rigorous design and development and repeated testing of the edge angle to improve the efficiency of use.

适用广泛 Widely applicable

- 主要可适用于实木、硬木、刨花板、密度板等，切削光滑无毛刺。
- Mainly applicable to solid wood, hardwood, particleboard, MDF, etc., smooth cutting without burrs.

Plum Blossoms

Plum Blossoms. Drill Wood With Art

Plum Blossom focuses on the research and development, production and sales of woodworking drilling products, and has first-class production equipment and advanced production technology. There are various types of plum tool products, including multi-rows drilling series, square hole drill series, mortise drill series, salad drill series, straight shank drill series, drill holder, drill row etc. products.

Plum Blossom company adheres to the business philosophy of: customer first, service first, and provides customers with high-quality products with high cost-effectiveness and quality assurance. The products are sold at both home and abroad.

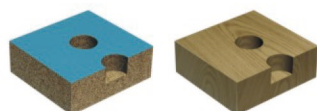

欧式盲孔钻 European blind hole drill

V型焊接

特殊V型焊接工艺，保证焊接强度，不易崩断。

Special V-welding process ensures welding strength and is not easy to break.

四槽排屑

四槽排屑设计，钻体外圆磨，同心度更好，钻孔轻快，不易爆边；

Four-slot chip removal design, external grinding of the outer diameter of the drill, better concentricity, lighter drilling, not easy to burst;

整体合金

刀口采用微细颗粒整体合金头，不易断，使用寿命长；

The knife edge adopts a fine-grained integral alloy head. Not easy to break, long service life;

TCT整体合金钻头 TCT integral alloy drill

钻杆合金

钻杆采用微细颗粒整体钨钢设计，强度和稳定性更高，超长使用寿命；

The drill pipe is designed with fine-grained monolithic tungsten steel, which has higher strength and stability and long service life.

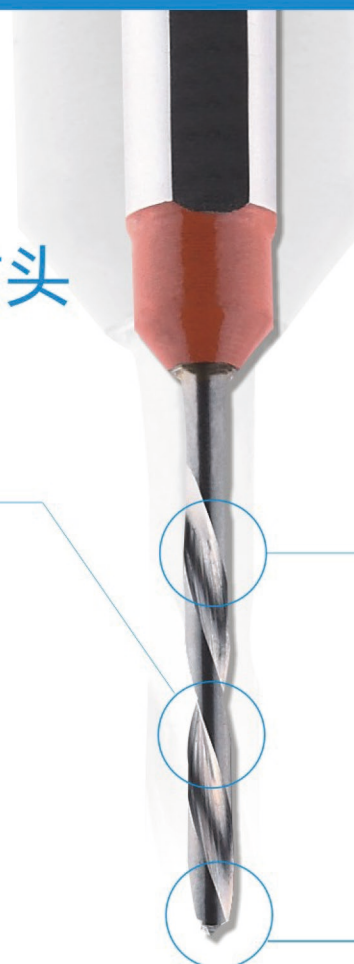

排屑顺畅

大旋角式设计，排屑更顺畅，加工效率更高。

The large-angle design makes the chip removal smoother and the processing efficiency higher.

刃口设计

独特切削刃口设计；
Unique cutting edge design;

Professional grade woodworking drill bit 专业级木工排钻钻头

刀头整体合金，减少钻头损耗，提高加工效果。

The overall alloy of the cutter head reduces the loss of the drill bit and improves the processing effect.

硬质合金成就卓越的切割质量，带来更长的使用寿命。

Carbide achieves superior cutting quality for longer life.

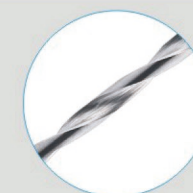

钻头刮刀优化设计，更有利于排屑，钻孔更洁净。

The optimized design of the drill blade is more conducive to chip removal and cleaner drilling.

适用设备：排钻、开料机、五/六面钻
Applicable Equipment:
Multi-Rows Drilling Machine,
CNC Cutting Machine,
CNC 5/6 Sides Drilling Machine.

合金头榫眼钻

TCT Head Mortise Drill Bit

Teflon Coating 特氟龙涂层

防锈耐腐蚀，提高刀具的抗磨性、抗粘性，延长使用寿命。

Anti-rust and corrosion resistance, improve the wear resistance and anti-adhesion of the tool and prolong the service life.

用于门锁孔一次成形，大大提高门窗家具生产厂家的工作效率，可结合门锁大小的实际情况定制不同尺寸

Used for forming the door lock hole once, Greatly improve the work efficiency of door and window furniture manufacturers, Different sizes can be customized according to the actual situation of the door lock size

采用45#钢制造出的刀柄
Tool holder made of 45# steel

刀柄精磨 Fine Grinded Shank

Four Cutting Edges 四刀刃钻头

刀刃采用进口合金钢，刀刃锋利，切削顺畅，开孔整齐无碎边。

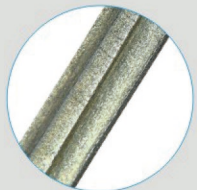

The blade is made of imported alloy steel, the blade is sharp, the cutting is smooth, and the opening is neat and without broken edges.

Professional grade woodworking drill bit 专业级木工排钻钻头

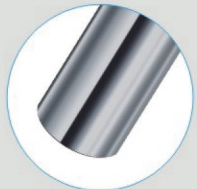

刀头整体合金，减少钻头损耗，提高加工效果。

The overall alloy of the cutter head reduces the loss of the drill bit and improves the processing effect.

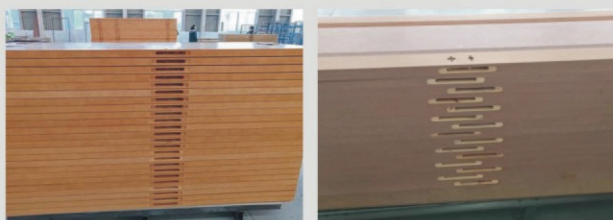

10mm通用柄径，适用市场通用手电钻，台钻、雕刻机等设备。

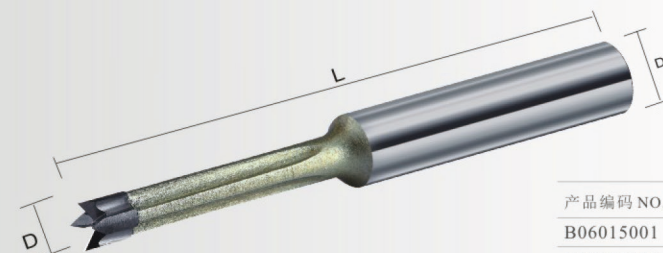

硬度高、耐磨、强度和韧性好、耐热、耐腐蚀。

High hardness, wear resistance, strength and toughness, heat resistance and corrosion resistance.

蓝博锯业品牌专注高端锯片的研发、生产与销售，拥有专业的研发队伍、技术精湛的专业人员、先进的加工机械设备、严格的管理制度。品牌旗下产品专注应用于家具制造、铝型材生产加工、亚克力材料加工、线路板等领域，采用德国进口原装基材，高精度焊接卢森堡合金，刃齿优化设计齿型最大限度提高切削品质。产品焊口牢固、性能稳定、刃口锋利、经久耐用，适用于各类木材。

Leabon focus on the R&D, production and sales of high-end saw blades. We have a professional R&D team, skilled professionals, advanced processing machinery and equipment, and a strict management system. The brand's products are focused on furniture manufacturing, aluminum profile production and processing, acrylic material processing, circuit boards and other fields. We use German imported original substrates, high-precision welding Luxembourg alloys, and optimal design of blade teeth to maximize cutting quality. The product has firm welds, stable performance, sharp cutting edges, and durability, and is suitable for all types of wood.

- 1：与硬质合金相比，工作寿命为50-150倍，甚至更高。
2：由于是电极放电研磨，相比较机械研磨方式，保证了锯片的研磨次数，一般可以达到6次。
3：因为热膨胀系数小，可获得更高精度的保证，从而得到更平整的锯切效果。
4：由于PCD材质的特性，可获PCD刀具在应用过程中的更长疲劳周期，从而确保了成品率，减少了进一步处理的工序。
- 1: Compared with the cemented carbide, the working life of 50 to 150 times or more.
2: Since the electrode discharge grinding, mechanical grinding method compared to ensure that the number of grinding blade, generally up to six times.
3: a small coefficient of thermal expansion, to ensure a higher accuracy can be obtained, resulting in a smoother cutting effect.
4: Since the characteristics of PCD material, PCD cutting tools be longer during application of fatigue cycles to ensure that the yield, reducing the further processing step.

锯铝材锯片

Aluminum Cutting Saw Blade for
CNC Panel Saw

产品说明

选用超硬合金，使用寿命长，噪音低。
Selection of hard alloy, long service life and low noise.

适用：精密切削

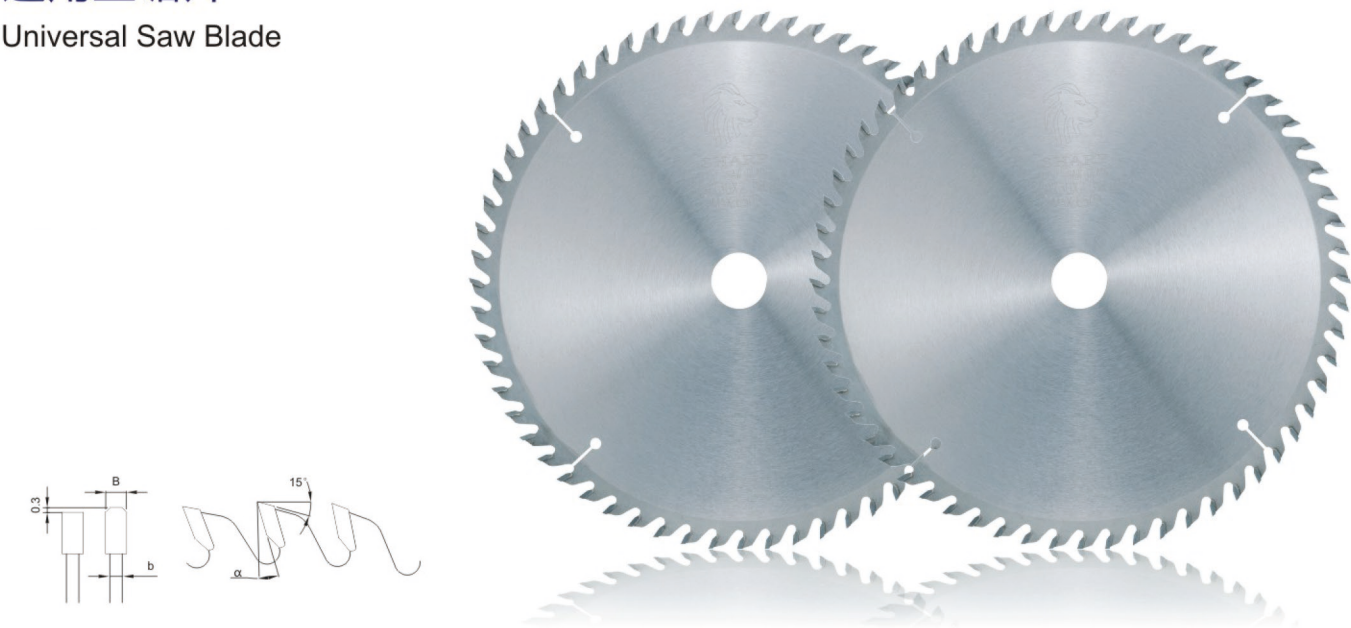

适合机械：电子开料锯机
切削材料：三聚氢胺或其它塑性材料贴面的刨花板、密度板、实木复合板材

Application:For fine cutting
Machines:CNC Panel Saw
Cutting material:Melamine or other laminated chip board,MDF,composite materials.

产品用途

Product Usage

- It is used when the edge banding machine performs polishing work, and it has a polishing and grinding effect;
- It is generally cut with twill and plain cotton cloth, and sewn with a strong seam blade, which has a strong grinding force;
- Wear resistance, long service life, fast light emission;
- Suitable for edge banding machines of major brands such as Nanxing, Huali, KDT, and Homag;
- The wheel axle is divided into two kinds of full cloth and iron core wheel, and the polished surface is bright and clean.

产品用途及特点

Use and characteristics

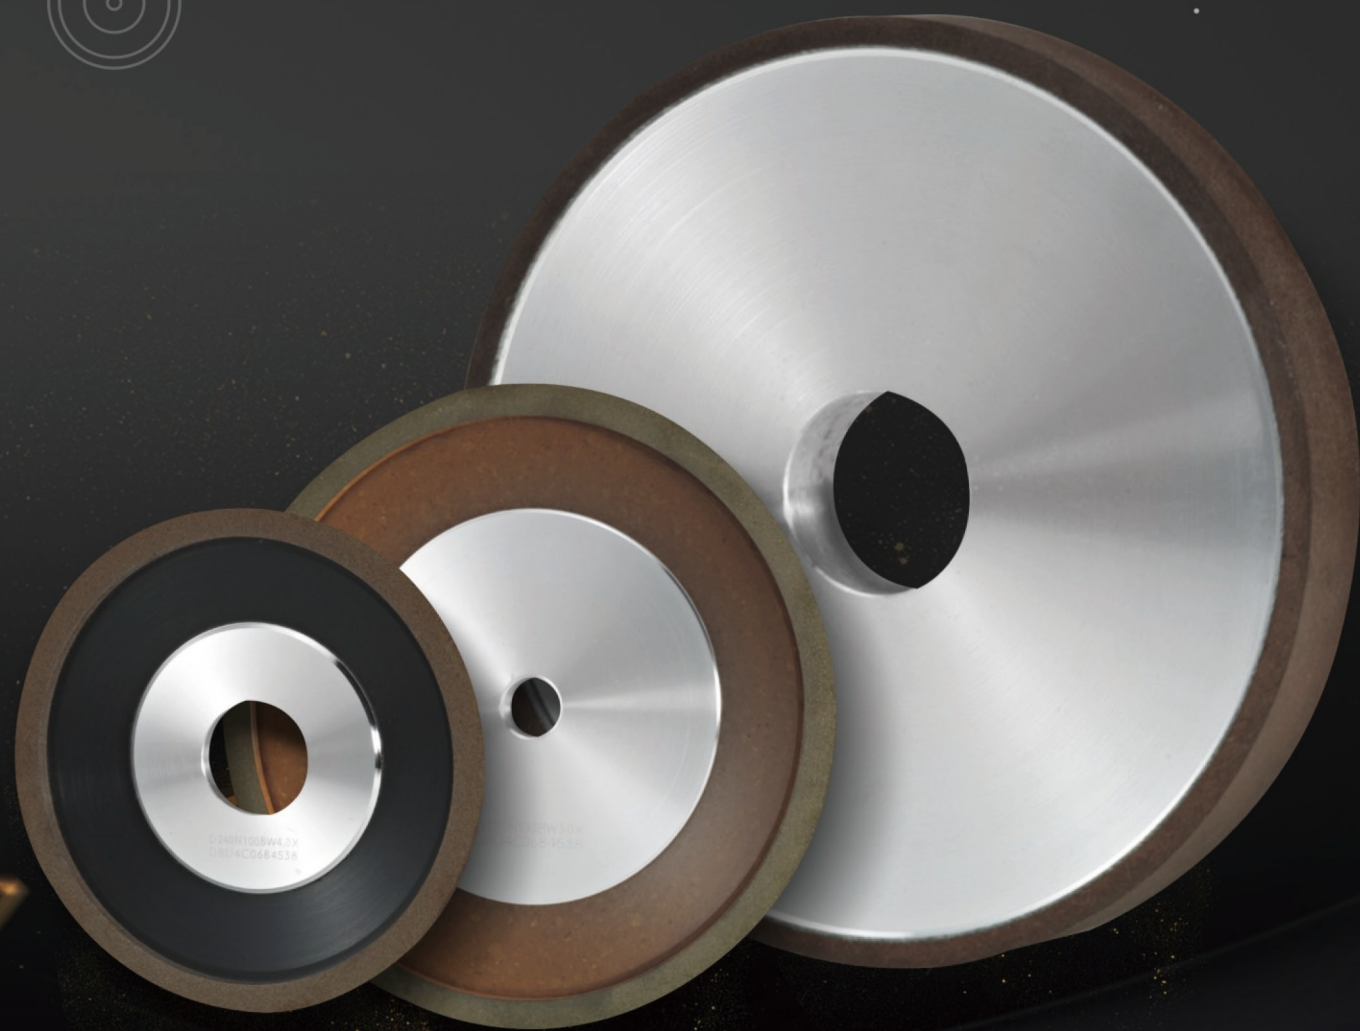

- The heat transfer silicone wheel can be hot stamped on a large area of hot stamping paper, brushed film, and heat transfer flower film, and transfer the hot stamping paper to plastic or film; Heat transfer silicone wheels are used for hot stamping of various plastics, metals, book edges, etc. Or transfer patterns to make glue;
- The material can withstand high temperature (300°C - 400°C), having a long service life (normal use can reach more than 100,000 times), and can be made with different hardness 40-90EA degrees according to customer requirements;
- The color is generally orange-red and white, and other colors can also be deployed. The characteristics of the product are good elasticity, high resistance to cracking, easy grinding at high temperature, long service life, not easy to deform, and can be used for large-area flat surfaces or deep rounds.

磨削效率高
使用寿命长

High grinding efficiency and
long service life

工艺先进 砂粒均匀

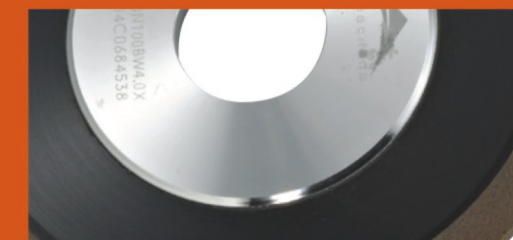

台湾原产树脂结合工艺先进，砂粒均匀，耐磨度高。

Advanced technology, uniform sand
Taiwan's original resin combined with advanced technology, uniform sand
and high wear resistance.

稳定性强 不易掉砂

树脂金刚石制作，加工中磨损少，使用寿命长，磨削比高。

Strong stability, not easy to lose sand
Made of resin diamond, with less wear during processing, long service life
and high grinding ratio.

磨削效率高 使用范围广

加工各种高硬度材料，特别是对普通磨料难以加工的材料。

High grinding efficiency, wide range of use
It can process a variety of high hardness materials, especially materials that
are difficult to process with ordinary abrasives.

Trust worthy tool family

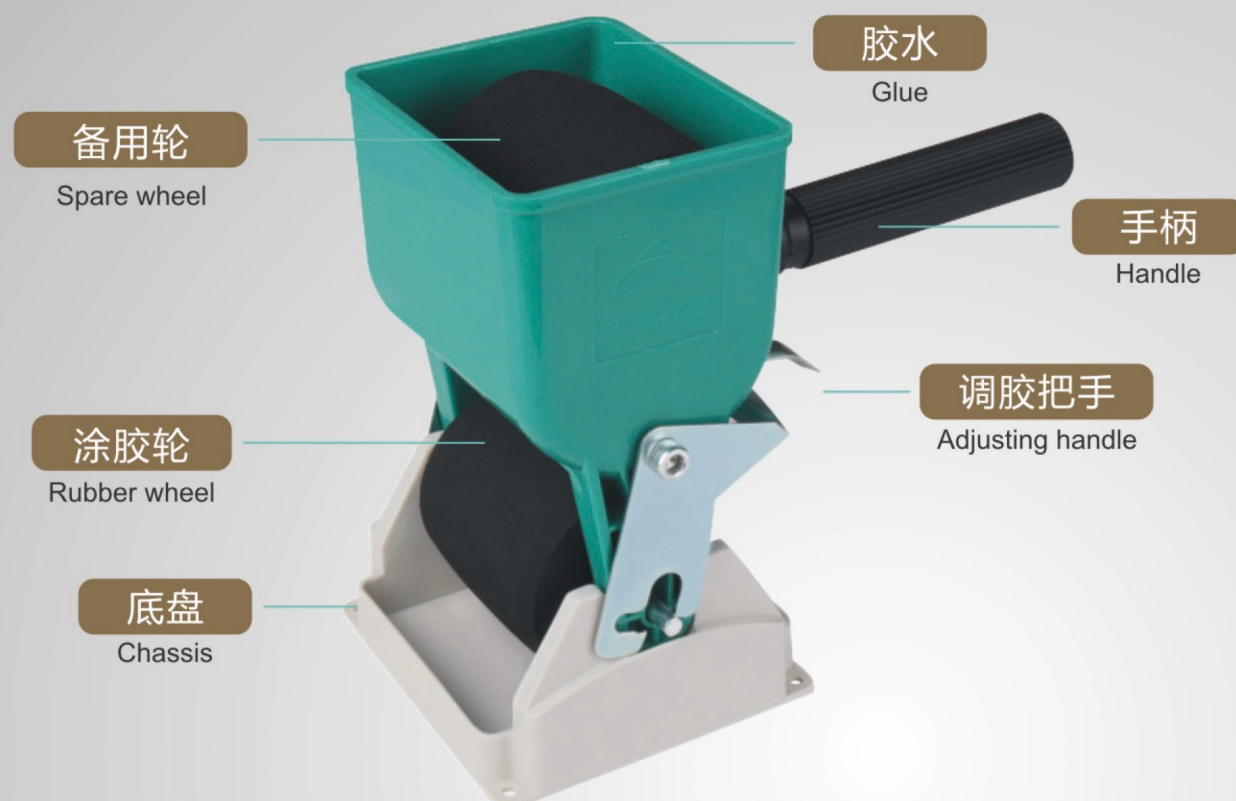

Gujin tools is a technical enterprise integrating research, development, production, sales and service, mainly specializing in fixtures, hand tools, power tools, pneumatic tools, electronic devices and other products. Since its establishment, gujin has mastered the core design and manufacturing technology, adhered to independent innovation, provided integrated solutions for customers, and provided cost-effective professional products and quality services for global consumers.

值得信赖的工具世家

古金工具是一家集研发、生产、销售、服务于一体的技术型企业，主营夹具、手动工具、电动工具、气动工具、电子器械等产品。自创立以来，古金掌握核心设计和制造技术，坚持自主创新，为客户提供整体解决方案，为全球消费者提供高性价比的专业产品与优质服务。

GLUING MACHINE 涂胶机

精巧设计 涂布均匀

送胶铝芯采用横纹设计，确保胶水均匀到达滚筒轮上。

Sophisticated design, Apply evenly

The glue-feeding aluminum core adopts a horizontal grain design to ensure that the glue reaches the drum wheel evenly

精选用材 轻盈质感

漏斗塑料采用心料选材，有优质物理性能，牢固耐用，不易老化。

Selected materials, light texture

Funnel plastic adopts materials which are selected carefully, having high-quality physical properties. It is strong and durable and not easy to age.

HIGH QUALITY F CLIP 优质F夹(玛钢)

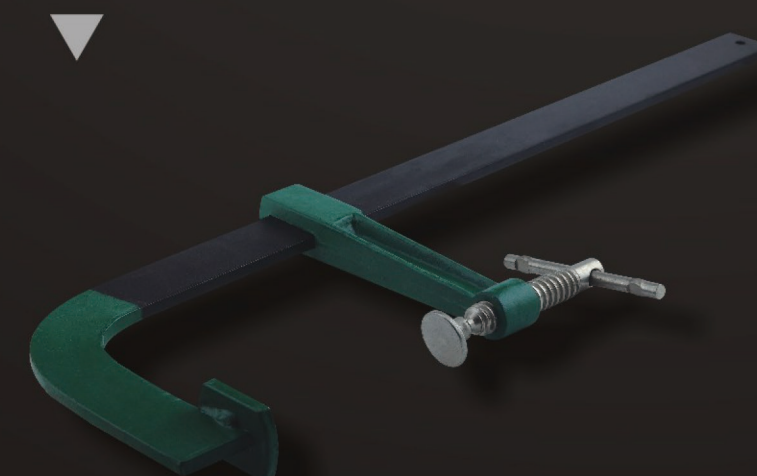

Optional:

Color and material of handle

ITALIAN TYPE F CLIP 意式F夹

Widened and thickened screw

The screw is thicker by about 6.5mm, and the front and back sides have a tooth pattern design. The surface of the screw rod is finely polished, and it is smooth and anti-slip.

Two-color rubberized handle

Two-color non-slip, safe work.

Malleable Steel Seiko

Adopted high-quality malleable steel, having been subjected to high temperature quenching treatment. High hardness, sturdiness, and durability.

Self-locking lock

Self-locking design; Automatically lock; Press to unlock; Easy to use; The clamping is stable and effectively prevents falling off.

球墨F夹

Ball ink F clip

[G01012]

夹具力臂采用高强度球墨材质，其硬度是普通铸铁的两倍以上，并且由于优异的抗拉伸性，能够长时用于重物及大力距的物料夹装。

Clamp arm adopts high strength ductile material, its hardness is more than twice that of ordinary cast iron, and because of the excellent tensile resistance, long for weights and vigorously distance of material clamping.

博特-烫斗
Iron

[H10002]

High temperature Hot fast
The highest temperature can reach 330 degrees
Use heating tube to generate heat. No need to replace. Heating piece, service life up to one year
The original design of the bottom plate effectively combines the plane, arc, groove, slot and other shapes in the lamination process

富深-烫斗
Iron

[H10002]

Heat up fast
Exclusively developed heating device;
Good constant temperature effect
The heat is even, and the veneer does not foam;
Can iron flat surface, wire groove, right angle side, concave arc surface, etc;
Need to replace chip or fuse;
The temperature is too high to intelligently stop heating;

平皮带

Flat belt

Flat belts are widely used in various mechanical conveying platforms. Use different rubber surfaces and composite materials. The adhesion is also different, and the production of different materials can produce characteristics such as heat resistance and corrosion resistance.

变速带

Variable speed belt

Variable speed belts are widely used in mechanical transmission. It has the characteristics of high wear resistance, no stretching and so on. It can adapt to the friction and high temperature under high-speed operation to the greatest extent, and the non-stretching characteristic also ensures the effective transmission of variable speed power.
